Gets Two Fish In One Catch

By Staff Reporter
NAPANEE, Aug. 11—As the season advances the fish stories are fast becoming bigger and bigger. The latest "story" is true, however, and two local fishermen are ready to vouch for its authenticity even though it is somewhat "fishy" sounding.

While fishing near Stoney Pointhis week, a local mail carrier Frank Harnden, and Cpl. Frank Harnden, and Cpl. Frank Harnden, is somewhat the same bait. Still fishing for some

vex, well, I'll guarantee you one thing. I'll shut up and say nothing more about the earth being flat.

"I maintain that the assertion of this fantastic speed of the earth — unsupported by evidence — is definitely a crime. While such proofs are lacking, our younger generation should not be brain conditioned to accept orthodox speculations as facts."

How did Shenton become a flat earthist?

"It was towards the end of the First World War," he explained. "The German zeppelins got me to thinking.

"I thought of designing a massive cargo carrier which could be inflated and raised, with its load, above the earth's surface.

"There it would stay while the old earth spun. I could see it spinning until America, was underneath the cargo carrier, then it would come down. Think of the possibilities of such a method of world transport. It was stagering.

"It was only when I went ito this theory," he said, that I realized that the peole who were supposed to be ne experts knew even less an I did about the 'rotation' f the world.

"I began researching and hinking and it became pretty vident to me why my cargo would never see America or any other place revolve beneath her. I realized the earth is motionless."

Shenton and his vews come in for a lambasting.

"I get a lot of adverse publicity, of course," he said with some resignation. "People think I'm, a crank and so on, but that's all right, because, you see, young people are getting interested."

Kennedy, Fla.

Although the panel consis ed primarily of physiologist. the scientists looked into th problem of cabin fires because of their relationship the kind of artificial atmosphere astronauts would be breathing. The report was completed before the fats Cape Kennedy fire and being used by the Nationa Aeronautics and Space Aministration in planning for its post-Apollo program.

The only anticipated serior effect of weightlessness of the respiratory system, a cording to the report, is thincreased possibility that as ronauts might inhale dust an other solid particles floatin

By JONATHAN EBERHAR

Science Service Writer NEW YORK — A comput "trained" to tell what a pe son is sceing by analyzing h brain waves has revealed th a person perceives color ar shape with different part his brain.

The finding was made I projecting a variety of cored light patterns hundre of times on a screen in froof subjects whose browness were being fed into computer. The slides used cluded such patterns as smored dots on a black bac ground, one big green spote an all - red slide chang into an all - green one.

A team of scientists from Rockland State Hospita Orangeburg, N.Y., found "one-to one correspondence between the patterns on the screen and the subject's brail waves as he watched.

THE LATE DR. M. I. BEEMAN.

THE LATE DR. M. I. BEEMAN.

The death occurred at Newburgh, on Saturday last, of Dr. Milton I. Beeman, one of the village's most respected citizens.

Milton Ira Beeman was born at Selby, Ont., on September 23rd, 1851. In early life he attended the school of his birthplace, and later the Grammar Schools at Newburgh and Napanee. In 1867 he obtained a First Class certificate from the County Board of Trustees, and taught school for over two years. From 1869 to 1873 he attended the Toronto School of Medicine, and graduated from Toronto University in the latter year, obtaining a silver medal. He began the practice of medicine in Selby, and in the Spring of 1874 opened an office in Centreville remaining there until 1893 of 1874 opened an office in Centre-ville, remaining there until 1893, when he moved to Newburgh, where he has practiced his profession ever

he has practiced ms profession ever-since.

In the year 1878 he married Lil-lian Henault. A family of six child-ren survive. The children are: Mrs. H. E. Paul, Fort William, Ont.; Mrs. J. K. Fraser, Cobourg, Ont.; Gilbert, Captain in the R. C. A., Halifax, N.S.; Harry, conduct-ing a real estate business at Fort William, Ont., and Mary and Louise, at home. at home.

William, Ont., and Mary and Louise, at home.

The late Dr. Beeman was an adherent of the Methodist Church, a Conservative in politics, and was for some years Secretary- Treasurer of the Liberal-Conservative Association of Addington. He was a member of the Ontario Medical Association, being Vice-President for one year; also a member of the Canadian Medical Association and the British Medical Association. From 1908 to 1912 he was a valued member of the Provincial Board of Health of Ontario.

In 1874-he became a member of the Masonic Order, and was a Past Master of Victoria Lodge, No. 199, Centreville, and Prince of Wales Lodge, No. 146, Newburgh. He was also Past Grand Pursuivant of the Grand Lodge of Canada. He was also Surgeon of the 47th Batt. Frontenae Infantry, and retired in 1899, with rank of Major, after fifteen years of faithful service.

Deceased took considerable interest in municipal affairs, and served his village for two years as Reeve, and for many years on the Council Board and School Board.

The funeral, which was under

for many years on the Council Board and School Board. The funeral, which was under

Masonic auspices, was held on Mon-day afternoon, many outside mem-bers of the Order attending.

Electrocution Cause Of Tompkin's Death

Inquest Held at Newburg on Friday-Verdict of Coroner's Jury

NAPANEE, June 27—"We, your coroner's jury empanelled to inquire as to how, when, where and by what means Frank Tompkins came to his death, find that the said Frank Tompkins met his death at Strathcona Paper Mills on June 18, 1936, by electrocution in the performance of his duties."

The above verdict was given at the coroner's inquest which was held in the community hall, Newburg, on Friday afternon. Dr. D. R. Hall, coroner, was in charge and K. S. Ham, County Crown Attorney, examined the witnesses. The jury consisted of Stewart Shetlar, W. A. Ramsay, James McGuire, Henry Luther, Anson Mc-Keown, Ed. Shaughnessy, Orlando Sutton and William Toner.

Employees of the paper mills gave evidence, including James O. Godfrey, Clifford Hartwick and David Sweet. Their evidence was quite similar and Mr. Sweet told of seeing Mr. Tompkins at 8 a.m. as the latter was

carrying charts to the office.
"I told Mr. Tompkins about the trouble pertaining to a switch," said the witness, and continuing said that he never saw Mr. Tompkins again until about 2 o'clock in the afternoon. "The man was lying on the ground and believing him dead, I notified the office," said Sweet.

Bruce Finlay, son of the proprietor,

said that he was at the plant on June 18 and questioned by Mr. Ham, ex-plained the electrical system in a delailed manner. The witness said that the paper mills have to contract with the Hydro-Electric for certain power and on the day in question the lighting transformer was the only one out

of commission.
"If a fuse burns out," said Mr.
Finlay, "we look after it, but if there is something very serious, we generally notify the Public Utilities Commission in Napanee." The witness also added: "There is no set arrangement with the Hydro-Electric Power Commission.

"It was our duty to make repairs on the day in question," said Mr. Finlay, who added, "Tompkins never reported anything wrong and I never knew of anything being wrong. I was in Napanee and was notified of the acci-Mr. Ham asked the witness:

"Does the company supply rubber gloves?" and the answer was "yes."

C. A. Walters, manager of the Public Utilities Commission, Napanee, gave a written statement and very minute explanation, stating that he had made an examination of the transformer on the afternoon of June 18, and had also made other inspec

In giving his deductions Mr. bility had tested the top terminal and found no energy. "He went up a ladder and opened the door by use of a fuse stick and possibly removed the carridge. I am of the impression that the unfortunate man in some manner lost his balance and in falling put his hand on the low terminal of the switch. The current passed through Tompkin's body by way of his feet as there were bad burns on both feet and on the one hand.'

This concluded the evidence and the jury some time later brought in
